This is the release note of the files for SX-Aurora TSUBASA local repository.

1. Overview

The following files are released. These files are used to install SX-Aurora TSUBASA software.

TSUBASA-soft-release-1.0-1.noarch.rpm

> The repository configuration package for SX-Aurora TSUBASA software repository.

RHEL7.3/TSUBASA-groups.xml

> The groups file of SX-Aurora TSUBASA software packages for RHEL7.3.

RHEL7.4/TSUBASA-groups.xml

> The groups file of SX-Aurora TSUBASA software packages for RHEL7.4.

RHEL7.5/TSUBASA-groups.xml

> The groups file of SX-Aurora TSUBASA software packages for RHEL7.5.

By the time when you use OS version, the stock directory of group definition file is different. Please use a group definition file of the appropriate version.

2. Installation

Please refer to SX-Aurora TSUBASA Installation Guide for the location of TSUBASA-groups.xml and the installation method of TSUBASA-soft-release-1.0-1.noarch.rpm.
